

Rumpelstiltskin –

Potentially Profitable Tale If You Find Yourself Grasping for Gold Instead of Straw...

Dear Friend and Fellow Investor:

The Oxford Club specializes in transforming fine straw into gold. We work tirelessly with our cherished clientele to turn their modest strands of profit-laden resources to shimmering spools of priceless, glistening thread.

Allow me to introduce you to *The Oxford Club*, a formidable corps of financial experts and entrepreneurs who make a living forging personal wealth and well-being for their families' futures.

Our extraordinary 65,000 members share a common commitment to build better lives through the smart acquisition of high-yield investments, and enjoy unparalleled access to a universe where valuable assets have a real opportunity to produce unimaginable gains.

• All this translates daily into a virtual golden litany of low-risk, high-yield investment opportunities in everything from aluminum in China to desalination installations in Jubail Industrial City, Saudi Arabia!

The Oxford Club's unique strength lies in the ability of its membership to focus their collective expertise and investment insight on profitable international markets which lay outside the volatile fringe of conventional investment vulnerability.

Let me summarize our shared philosophy: "If you have a dollar and I have a dollar, and we exchange dollars, we still only have a dollar each. But if you know of an investment opportunity, and I know of an investment opportunity, and we exchange them, then we now have two opportunities each."

As a premier international investment network, *The Oxford Club* is enjoying unprecedented gains and growth in the highly competitive and dynamic international arena of smart investment. But today, *The Oxford Club* would like to expand and enrich its membership base by extending a lion's share of its proven investment resources to new partners.

Allow me to introduce the captain of our flagship, Investment Director Alexander Green.

After more than two distinguished decades as a portfolio manager at one of the world's largest banking institutions (one with more than \$500 billion in assets under management), Mr. Green left his position to create one of the world's most lucrative investment networks. Under his keen leadership, *The Oxford Club* has become a silent force of investment shepherds who thrive on protecting one another and leading one another to greener financial pastures in their collective quest for financial success.

Here's an example of one of our premier investment opportunities: Buy gold, now!

According to a recent article by Alex Green, in 1999 the price of a troy ounce of "the barbarous relic" bottomed out at \$ 250 per ounce, the lowest in the previous 20 years. Today, the soaring value of gold is hovering around \$ 765 per ounce, and continues to rise!

While the gold market is traditionally volatile, it makes good sense, according to Green, to invest in gold now. There is no reason to believe that the value of gold will see a significant decrease anytime soon. In an article entitled "Six Reasons to Own gold Before It Breaks its all-time High,"

Mr. Green makes the following observations:

- With a decrease in the value of the dollar, the value of gold tends to increase against other major world currencies...
-
- In an environment of 'fear of inflation,' gold is always a strong hedge against eroding revenues...
-

- The reality of emerging middle classes in both China and India is creating an increased demand for gold.
-
- Discovery supplies for mining companies worldwide are depleting, creating a greater demand for real precious metals, especially gold.
-
- With increased world-wide political and economic instability, gold is a natural ‘safe haven.’ To which individuals tend to gravitate. And finally,...
-
- The current ‘trend’ favors gold, “...and good traders know better than to fight the broad trend in an asset class.” (Green) And finally,

But here’s the critical point for potential members like yourself: You do *not* have to be

independently wealthy, or have a secret stash of gold bullion to qualify for membership with *The Oxford Club*, or have a million-dollar nest-egg in order to come on board...

All you need is smart straw – in other words, the willingness to consider a fresh, lucrative vein of sound, trustworthy recommendations from smart, sympathetic practitioners in the trade...and the courage and good sense to freely and frequently invest a reasonable portion of whatever resources you *do* have in low-risk, high-yield markets...And then sit back and revel in a predictable, invigorating wash of wealth in the company of a family of friends.

Today, I am offering you a special introductory membership fee of \$ 49, or, should you choose, a *Premiere level* membership fee of just \$ 79... (Compared to our customary annual fee of \$ 159)!

Invest now, and put yourself and your family under the privileged, protective care of one of the world’s preeminent investment families. Allow us to work *with* you and *for* you to transform those golden strands into lucrative spools...A golden thread that is expertly woven can so increase and enrich its yield that it soon becomes a golden spinning-wheel of wealth!

Cordially,

James B. Cooke,

Honorary Chairman of *The Oxford Club*
